KG AIRCRAFT ROTABLES

SPECIALISTS IN THE SUPPLY OF AVIATION COMPONENTS

ABOUT US

Kanematsu Tokyo HQ

KG Aircraft Rotables Co., Ltd. Headquartered in Dublin, is a subsidiary of **Kanematsu Corporation**, founded in 1889, Kanematsu is one of the oldest trading companies in Japan. Its global network of companies today operates from over 31 cities worldwide, with annual sales in excess of US $7 billion.

KG KANEMATSU

Within that network, **KG Aircraft Rotables** operates as a division of **Kanematsu Corp**.

WHAT WE DO

KG Aircraft Rotables specialise in the supply and repair management of Airbus A320 Family, A330, A340, Boeing 737, Boeing 747, CFM56-5 and CFM56-7 Rotable components.

We offer nose to tail Rotable support, including engine sales and lease, technical services, lease packs and Power by the Hour programs.

With warehouse and distribution centres in the UK & USA, we offer a dedicated service supported 24 hours a day 365 days a year.

AOG 24/7 TEL +44 (0) 1509 670820

WHAT WE DO

Our services include:

- Sales of aircraft rotables components
- Repair Management
- Engineering Support & Technical Services
- Aircraft and Engine Leasing Solutions

ASSETT ACQUISITION

KGAR acquires stock through a program of strategic part out projects, purchasing complete aircraft for disassembly, or by acquiring parts in packages.

We use our vast knowledge and experience of the aviation industry, to seek out the best available assets for acquisition, so we can offer the highest level of support to our customers worldwide.

ASSETT ACQUISITION

Asset Acquisitions

AIRBUS A320-200 MSN: 619, AIRBUS A340-300 MSN 273

BOEING 737-800 MSN: 30494, BOEING 737-800 MSN: 30495

BOEING 737-800 MSN: 29968, BOEING 737-600 MSN: 28288

BOEING 737-600 MSN: 28296, BOEING 737-600 MSN: 28297

BOEING 737-600 MSN: 28297, AIRBUS A340-300 MSN: 208,

BOEING 737-800 MSN: 29922, AIRBUS A330-200 MSN: 638,

AIRBUS A319 MSN: 2691, AIRBUS A319 MSN: 2754,

AIRBUS A330-223 MSN 322, AIRBUS A319 MSN: 2519,

AIRBUS A319 MSN: 2555, BOEING 737-800 MSN: 30652,

BOEING 737-700 MSN: 34022, BOEING 737-800 MSN 34899

These purchases further confirm our commitment to our global customers who operate Boeing 737NG, Airbus A330 & A320 family aircraft.

Our R&O team is highly experienced in managing the repair, overhaul and modification of an impressive volume and variety of Rotable components. Turn-around times are constantly monitored, and all components are released back to service with either CAA /EASA/FAA/TCCA/CAAC release certificates.

All repair stations used by KGAR are approved by the relevant authorities and are continuously monitored to ensure compliance with KGAR quality standards. We work closely with operators and key repair vendors to improve component reliability, reduce aircraft downtime and drive down costs.

KGAR offers bespoke component modification packages to operators wishing to upgrade their aircraft.

QUALITY

The directors, management and staff are committed to the achievement and maintenance of the KGAR Quality Management system, approved to AS 9120B (technically equivalent to prEN 9120:2016 and SJAC 9120:A) ISO 9001:2015 and FAA AC 00-56B standards.

Quality control is a fundamental part of every process within KGAR and is diligently monitored and audited by our management team. Our sales and support team is dedicated to providing fully certified and traceable components to our customers.

Effective from the 8th May 2016 KG Aircraft Rotables has received AEO authorisation (AEOF) for Customs and Security, AEO status is an internationally recognised quality mark indicating that our role in the international supply chain is secure, and that our customs controls and procedures are efficient and compliant.

ENVIRONMENTAL POLICY

In keeping with Kanematsu's Code of Conduct, the Company defines the following Environmental Policy.

•01 Basic management policy for the environment

We conduct corporate activities with sufficient consideration given to maintaining a healthy global environment and aim for sustainable development.

•02 Compliance with environment-related laws and regulations

In the activities of the Company, we comply with environment-related laws and regulations in Japan and abroad, as well as international rules and practices.

•03 Constant improvement of systems

In order to make environmental activities more effective, we constantly improve our environment management systems.

WATER CONSERVATION

•04 Attention to the development of a low-carbon society/recycling-oriented society

Aiming to reduce greenhouse gas emissions, we promote energy conservation and make climate change mitigation and adaptation efforts. We strive to realize sustainable patterns of resource use and to address natural resource depletion by proactively engaging in energy conservation, reduction of waste and reuse and recycling of resources.

•05 Attention to the environment in business activities

We strive for environmental conservation and the prevention of environmental pollution and consider biodiversity and the conservation of natural ecosystems in our business activities.

•06 Establishment of the environmental management system of the Group

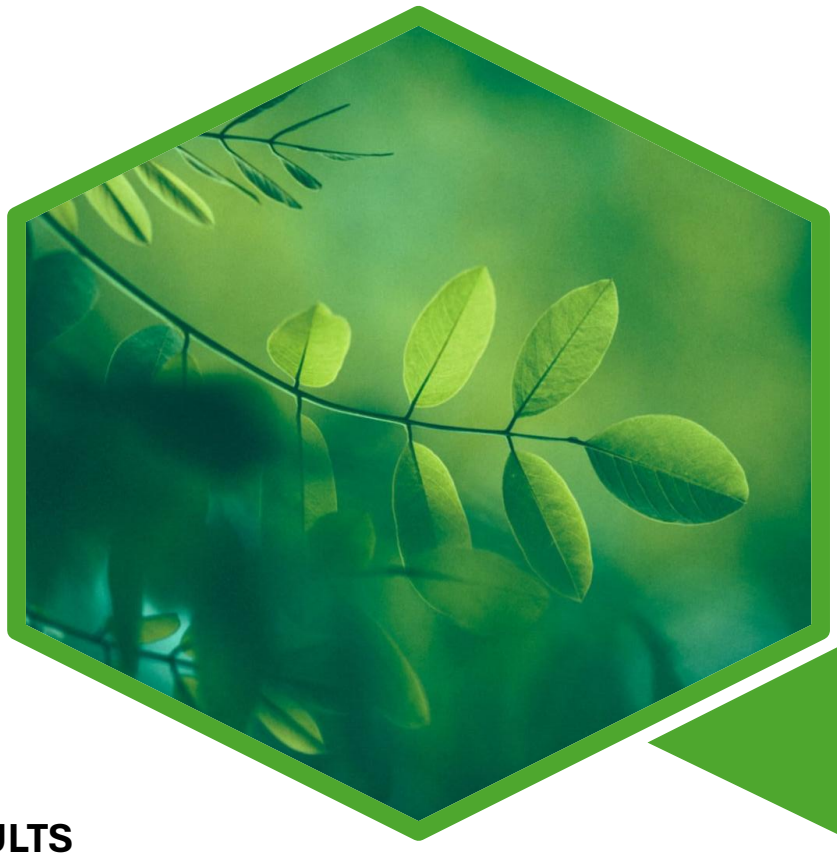
We utilize the ISO 14001 environmental management system to establish an environmental management system for the Company and the Group, responding appropriately to environmental issues and working constantly on improvements.

•07 Publicity and disclosure of environmental policies

We ensure that our executives, employees, and companies in the Group are well aware of our environmental policies, and we also disclose them to the general public through our website and the like.

Metrics CO_2 emissions

As our Group does not own many plants and generates little greenhouse gas emissions other than CO_2, we used CO_2 emissions as the indicator for evaluating the climate-related risks and opportunities.



RESULTS

(FY2024) 26,569t-CO2

（Assured　Scope1：8,781t-CO2　Scope2: 17,788t-CO2

(FY2023) 28,321t-CO2

(Assured　Scope1：9,507t-CO2　Scope2: 18,814t-CO2

(FY2022) 29,497t-CO2

（Assured　Scope1：9,772t-CO2　Scope2: 19,725t-CO2

(FY2021) 27,800t-CO2

(Estimates、Scope1：9,200t-CO2　Scope2: 18,600t-CO2

First, we will aim to achieve carbon neutrality as soon as possible, by 2025. We will reduce CO_2 emissions by shifting to renewables; for any remaining emissions that cannot be reduced, we will offset them with the credits generated from our business--converting our contribution to GHG emissions reduction in the REDD+ project, etc. into credits--to achieve carbon neutrality.

We will keep expanding our clean fuel and renewable energy business, REDD+ project, and JCM project to increase avoided emissions, aiming to become carbon negative at −150,000 t-CO_2 and −1,000,000 t-CO_2 by 2030 and 2050, respectively, thereby contributing to GHG emissions reduction on a global scale.
